Algebra 2 - Answer Keys - MattinglyMath

Algebra II also returns to and expands upon the previously-taught practice of solving single-variable equations and introduces more challenging and complicated topics into coursework. Like in Algebra I, students are taught to factor polynomial expressions, use FOIL, and simplify and expand quadratics and rational expressions.

Algebra 2: Rational Functions Test Review Sheet

Note as well that the numerator of the second rational expression will be zero. That is okay, we just need to avoid division by zero. For the third rational expression we will need to avoid $(m = 3)$ and $(m = -2)$. The final rational expression listed above will never be zero in the denominator so again we don't need to have any restrictions.
