called setae on each segment -have closed circulatory system-have well-developed nervous system with brain & nerve cords

## **Annelid - Wikipedia**

Segmented worms are in the phylum Annelida, which has over 22,000 known species. These worms are known as the segmented worms because their bodies are segmented, or separated into repeating units. Besides the earthworm, the segmented worms also include leeches and some marine worms. Most segmented worms like the earthworm, feed on dead organic matter.
